DETAILED ACTION

Priority

This application is a continuation of 09/256,413 02/24/1999 which claims benefit for domestic priority (to a provisional application 60/100,426 02/25/1998) under 35 U.S.C. §§ 120 and /or 121 is acknowledged.

Information Disclosure Statement

Receipt is acknowledged of Information Disclosure Statement (IDS), filed on 12/18/00, which has been entered in the file.

Status of Claims

Claims 1-20 are pending in the application. Receipt is acknowledged of amendment / response filed on January 20, 2004 and that has been entered.

Claims 16-19 are withdrawn from further consideration pursuant to 37 C.F.R. 1.142 (b) as being drawn to a non-elected subject matter.

Response to Election/Restriction

In response to the restriction requirement, Applicants have elected Group I, which includes claims 1-15 and 20 drawn to a compound and composition, and the elected compound as set forth on page 2 (Remarks) with traverse is acknowledged. The traversal is on the ground(s) that all the pending claims should be rejoined and examined with the elected Group I because "it is not a burden on anyone to have all of claims 1-20 appear in the same patent" (Remarks, page 3) and therefore a search and examination of the entire Markush group should be made without serious burden.

The Examiner respectfully disagrees with the Applicants because the products of groups I-II differ materially in structure and in element from each other and therefore, are capable of supporting their own patents. Applicants elected compound contains a core indole ring, which is further substituted by the non-heterocyclic phenyl groups (R_4), wherein in claim 1, for example, R_4 is selected from the group consisting of pyridinyl (546 class), furyl, thienyl (549 class), pyrrolyl (548 class), and other art-recognized diverse group.

The invention groups I-II are related to a set of structurally diverse compounds, and their methods of use (chemical structures, which are similar, are presumed to function similarly, whereas chemical structures that are not similar are not presumed to function similarly), which do not possess a substantial common core wherein a reference anticipating one would not necessarily render the other obvious and to search all the above groups in a single application would be an undue burden on the Examiner. Because of the plethora of classes and subclasses in each of the Group, a separate search considerations are involved, which would impose a serious burden on the Examiner to perform a complete search of the defined areas if unrestricted. Also the fields of search are not coextensive. The wide disparity among the groups requires that many divergent fields must be searched, including all classes and subclasses of U.S. and foreign patents as well as journals and publications. Examiner understands that shortening the patent term that Applicants will have for the divisional application due to restriction and /or long prosecution history of this particular case. Since this case is a RCE application, a continued prosecution and examination of relevant art, reanalysis of claims and therefore, restriction practice is not uncommon. However, Examiner may reconsider to rejoin method of use claims commensurate in scope with the product claims when the case would be found in condition for

allowance [provided those method claims are free from 35 U.S.C. §112 first (including written description, reach-through claim language and/or scope-enablement issues) and second paragraphs]. For these reasons, Applicant's arguments are found unpersuasive and, therefore, the requirement for restriction and election of species is still deemed proper.

Applicants preserve their right to file a divisional on the non-elected subject matter.

As set forth in the restriction requirement and an election of a single compound (or set of compounds), the invention will encompass all compounds that fall within the scope of the claim is as follows:

A compound having the formula in claim 1 wherein:

R₁ and R_{1'} are as claimed,

R₆ is as claimed,

R₇ is as claimed except "or morpholinyl",

R₂ is as claimed,

R₃ is selected from H, -CF₃, C₁-C₆ lower alkyl, C₁-C₆ lower alkoxy, C₃-C₁₀ cycloalkyl, C₁-C₆ alkyl, -CHO, halogen, (CH₂)_nC(O)NH₂,

R₄ is selected from the group of C₁-C₆ lower alkyl, C₁-C₆ lower alkoxy, -(CH₂)_n-C₃-C₆ cycloalkyl, -(CH₂)_n-S-(CH₂)_n-C₃-C₆ cycloalkyl, -(CH₂)_n-O-(CH₂)_n-C₃-C₆ cycloalkyl, n is as claimed,

R₅ is as defined (other variables such as L¹M¹, and Y etc do not apply as they are beyond the scope of elected compound and treated as non-elected inventions).

As a result of the election and the corresponding scope of the compound identified, claims 16-19 and the remaining subject matter of claims 1-5 and 20 are withdrawn from further

consideration pursuant to 37 CFR 1.142 (b) as being drawn to non-elected inventions. The withdrawn subject matter of claims 16-19 is properly restricted as it differs materially in structure and in element from the elected subject matter supra so as to be patentably distinct there from.

Objections

Claims 1-5 and 20 are objected to for containing non-elected subject matter. The claims should be amended to exclude non-elected subject matter and within the scope of elected compound.
